

AP Komplex

With extracts of ginger, gentian, liquorice, dandelion and garlic

The power of natural substances

Plant extracts have been used by herbalists for a long time as a way to support specific organ systems. Modern nutritional supplements combine the centuries-old experience with plants and the modern knowledge of nutritional processes in the body. Thus, it is possible to support the target organs through proficient combination of different extracts and their secondary plant metabolites.

Biogena AP Komplex: For the immune and digestive system

The Biogena AP Komplex contains the concentrated plant power from traditional extracts, coupled with vitamin C from acerola extract. This natural complex is ideal for people who want to do something good for their immune defence and their digestive system. The included garlic has an antibacterial effect and supports normal liver function. Together with the vitamin C and ginger, garlic also promotes immune function. In addition, the digestion is also naturally supported by this complex, since ginger, garlic, dandelion as well as liquorice help to maintain normal digestive function.

Possible applications:

- To support the resistance
- As a nutritional measure to support the liver functions and digestive system
- To maintain the immune defence, for example in the wet-cold season

Bioavailable micronutrients in a pure form

- Without colours, flavours or glazing agents
- Gluten-free
- Lactose-free
- Hypoallergenic
- Vegetable capsule shell
- 100 % vegan
- Quality tested
