

# Astaxanthin 4mg

## Natural astaxanthin from algae

### astafit®: the guarantor for Austrian astaxanthin of the highest quality – now new as vegan product

In nature there are over 700 known natural carotenoids - astaxanthin is one of them. Astaxanthin originates from the green microalga *Haematococcus pluvialis*, which forms the characteristic red natural pigment as a stress reaction in the case of food or water deficiency, strong sunlight or extreme cold. Astaxanthin enters animals and humans via the food chain and is responsible for the reddish colouring of crustaceans, lobsters and salmon, for example. 100 % native astaxanthin is produced in a specially designed, closed indoor algae breeding system before it finds its way into Biogena's capsules. This system guarantees the production of high quality algae substances under optimal conditions - and all this "Made in Austria"! For this reason Biogena Astaxanthin (astafit®) offers 100 % natural astaxanthin in highest purity and quality, which differs significantly from synthetically produced astaxanthin. The natural carotenoid dissolved in sunflower oil in the capsule is hermetically sealed, which keeps the active ingredient available for longer and also ensures maximum bioavailability. By using the latest technology, encapsulation in a vegan capsule shell is now also possible. Biogena Astaxanthin 4 mg - Austrian quality from passion.

## Astaxanthin 4 mg

- Contains airtight, natural astaxanthin (astafit®) from the green alga *Haematococcus pluvialis* in vegan capsule shell
- From Austrian algae cultivation
- astafit® guarantees the carotenoid astaxanthin in constant high quality and purity

### Possible uses:

- For targeted intake of the carotenoid astaxanthin (astafit®) of the highest quality and purity

### Bioavailable micronutrients in a pure form

- According to the pure substance principle
- Without colours, flavours or glazing agents
- Gluten-free
- Lactose-free
- Hypoallergenic
- Vegetable capsule shell
- 100 % vegan
- Quality tested
