

361° Multi+ Superior

361° Multi+ Superior: The all-round solution with the 1° -extra

With 361° Multi+ Superior, BIOGENA heralds a new generation of multipreparation. Intensive development work has resulted in a refined composition of 43 valuable ingredients that supply the body and mind with valuable micronutrients and at the same time support mood and emotional balance.

Perfect all-round care includes more than the supply of vitamins, minerals and trace elements. Fully aware of this, the BIOGENA science team developed the all-in-one solution 361° Multi+ Superior, which has 1° more to offer thanks to its innovative botanicals, lacto- and bifidobacteria for a good "gut feeling", as well as ubiquinol (KANEKA UBIQUINOL™).

The recipe is also raised to a new level by a series of proven premium brand raw materials. These include stomach-friendly vitamin C in the form of Ester-C®, activated folate as Quatrefolic®, clinically validated and patented vitamin K2 as Menaquinone-7 (K2VITAL®), iron bisglycinate as Ferrochel™ and AstaFit®, high-quality Austrian astaxanthin.

361° Multi+ Superior - for Body x Mind x Mood

x Body: With copper, selenium, zinc and vitamins C and D to support the immune system. In addition, vitamin E and riboflavin provide protection against oxidative stress. Lacto and bifidobacteria colonise the intestine and thus specifically support well-being.

x Mind: With pantothenic acid, which contributes to normal mental performance. Full focus through the day thanks to iron, folate and vitamin B6, which help reduce tiredness and fatigue, and vitamin B2, which supports energy metabolism.

x Mood: With saffron extract, the queen of spices. Saffron contributes to emotional balance and helps maintain a positive mood. In addition, magnesium, biotin and vitamin B12 contribute to normal mental function.

361° Multi+ Superior - 361° all-round care

- The 3 in 1 collection for Body x Mind x Mood
- With 43 ingredients combined in one capsule
- With 32 vitamins, minerals & trace elements + innovative botanicals, lacto- and bifidobacteria and ubiquinol for the 1° Extra
- Optimally dosed and balanced
