## These 5 diamonds give your brilliance the unsurpassed shine

- **Keep your health** with vitamins C, D, selenium and zinc to support a functioning immune system. Magnesium and both vitamins D and K help maintain stable bones. Vitamin B1 is sometimes nicknamed the "heart vitamin" because it supports heart function. Vitamins C and E as well as zinc and selenium protect your cells from oxidative stress.
- **Keep your focus** with pantothenic acid as a contribution to mental performance. In addition, the trace elements iodine and iron support normal cognitive functions, such as perception, thinking, knowledge. For visual focus, vitamin A contributes to the maintenance of normal vision.
- **Keep your energy** with the B vitamins involved in energy metabolism riboflavin, niacin and vitamin B6. Folate and magnesium help reduce fatigue and tiredness. Potassium and magnesium support normal muscle function.
- **Keep your balance** with vitamins of the B group such as thiamine, niacin, vitamins B6 and B12 and magnesium to contribute to the stable functioning of the nervous system and psyche. Potassium helps maintain normal blood pressure.
- **Keep your glow** with zinc, which is in use with biotin to maintain healthy skin and hair, and together with selenium supports the maintenance of normal nails. Vitamin C contributes to the formation of collagen for normal skin function. Copper supports normal skin and hair pigmentation and maintenance of normal connective tissue. Vitamin C, E, zinc, copper and selenium protect cells, especially of the skin, from oxidative stress and thus support beauty from within.
