

# BIOGENA AESTHETICS

## Collagen+ Superior

### Exceptional Glow inside out

Glow is the radiance from within. It is not to be found in genes or luxurious skin care creams alone. Glow is the natural radiance that makes you feel confident, happy and beautiful at every stage of life. A healthy lifestyle with enough sleep and a conscious diet as well as sufficient fluid intake contribute to this glow.

### Radiance at the point of science

Immerse yourself in the extraordinary world of Glow, where you radiate from the inside out: A microdrink with a super-fruity cherry and thyme flavour explosion, BIOGENA COLLAGEN+ SUPERIOR delivers the premium blend with the "+", that certain extra in the form of ingredients carefully selected with scientific expertise.

Collagen is the most common protein in the human body and is found in different types depending on the type of tissue. This is also the case in our skin: beneath the visible epidermis lies the dermis, which contains the fascinating structural protein collagen that impresses with its exceptionally high elasticity. Together with fibres made of elastin, it tightens into a rubber band-like net structure that forms the inner "corset" of the skin. The premium collagen NATICOL® contains mainly fish collagen type I peptides. It is characterised by top bioavailability and, as a by-product of responsible aquaculture, also sustainably conserves marine resources.

New skin cells are constantly being formed in the epidermis, and this process is dependent on a good supply of nutrients. Biotin and zinc have been investigated in various studies and their positive effects on skin health, including the maintenance of normal skin, have been proven. In addition, zinc protects cells from oxidative stress. Pomegranate extract, which contains polyphenols and ellagic acid, and hibiscus flower extract complete the premium preparation.

COLLAGEN+ SUPERIOR - designed to make you glow.

### COLLAGEN+ SUPERIOR

- 7.5 g premium collagen Naticol® with unique fish collagen peptide profile
- Biotin and zinc contribute to the maintenance of normal skin
- Zinc helps protect cells from oxidative stress
- Zinc has a function in cell division
- Rounded off with pomegranate extract with polyphenols and ellagic acid as well as hibiscus flower extract
- Fruity drinking pleasure thanks to the natural aroma of cherry and thyme
