

Coralicea®

For beautiful skin and stable bones

Beauty from within can also be achieved with the correct diet

Caring for skin, hair and nails from within – this is where the correct nutrients can be of help. Selected nutrient combinations can therefore help support connective tissue structures, and maintain the beauty of nails, hair and skin. A good supply of the correct nutrients can help keep hair and nails beautiful and make you feel visibly better in your own skin.

Biogena Coralicea® – essential minerals from sea corals

Far away from the living reef of Okinawa, in deep, dark waters where corals cannot grow or live, the seabed itself consists of fossilized coral grains. The Okinawa sango corals are harvested there using environmentally friendly methods. Biogena Coralicea® combines the minerals calcium and magnesium from original Okinawa Sango corals with natural bamboo sprout extract (*Bambusa arundinacea*) containing silicon and the trace elements copper, iron and zinc.

Physiological importance of some selected vital substances contained:

- Zinc contributes to the maintenance of normal skin, hair and nails
- Copper contributes to the maintenance of normal connective tissue and normal hair pigmentation. Furthermore it helps protect the cells against oxidative stress
- Calcium is important for cell division
- Together with magnesium, calcium is required for the maintenance of normal bones

Possible uses:

- To maintain beautiful skin, hair and nails
- To support the connective tissue structures
- For a normal pigmentation of skin and hair

Bioavailable micronutrients in a pure form

- Pure substance principle
- Without colours, flavours or glazing agents
- Gluten-free • Lactose-free
- Hypoallergenic
- Vegetable capsule shell
- 100 % vegan
- Quality tested
