

Cranberry Formula

Active complex with vitamins, trace elements and cranberry

Cranberry: Naturally valuable ingredients

The cranberry (*Vaccinium macrocarpon*) is a close relative of the blueberry and lingonberry. Its name comes from the first settlers of America who called the fruit "crane berry" because the filaments of the flowers resemble the bill of a crane. The Indians of North America valued the bright red berries with the bitter-sour taste for their valuable ingredients. These special vital substances include phenols, proanthocyanidins, quercetin and other natural secondary plant substances.

Cranberry Formula

- Active complex from 400 mg standardised cranberry extract plus synergistic, antioxidative vitamins and trace elements
- Vitamin C and zinc support the normal functioning of the immune system
- Selenium also contributes to the normal functioning of the immune system
- Vitamin E is a valuable antioxidant and contributes to protection of cells from oxidative stress; here it is supported by the vitamins C, zinc and selenium

Possible uses:

- For general support of the immune defence
- To support the immune system, particularly in difficult situations such as sports or stress
- For the targeted intake of valuable cranberry ingredients
- As nutritional support to protect the cells against increased oxidative stress, e.g. caused by UV-radiation or environmental pollution

Bioavailable micronutrients in a pure form

- Pure substance principle
- Without colours, flavours or glazing agents
- Gluten-free
- Lactose-free
- Hypoallergenic
- Vegetable capsule shell
- 100 % vegan
- Quality tested
