

DiaPhyt® Formula

Contains chromium for the blood sugar level

Chromium – for a normal blood sugar level

Our diet plays an important role in the maintenance of a balanced blood sugar level. This in turn, is important for our performance and well-being. Selected micronutrients, such as chromium, can help maintain the normal blood sugar levels. Our diet mainly contains chromium in the trivalent form. Good sources of chromium are shellfish, nuts (particularly Brazil nuts) and whole grain products.

Biogena DiaPhyt® Formula can help increase the daily chromium uptake and thus contribute to the maintenance of normal blood sugar levels. Furthermore, DiaPhyt® Formula contains valuable plant substances from tropical vine (*Gymnema sylvestre*), bitter melon (*Momordica charantia*) and ginseng root (*Panax ginseng*). Plant-based polyphenols and catechins from green tea complement the range of micronutrients and therefore, guarantee a high-quality preparation for daily supplementation.

DiaPhyt® Formula

- Chromium helps maintain a normal blood sugar level.
- Contains plant extracts from tropical vine (*Gymnema sylvestre*), bitter melon (*Momordica charantia*) and ginseng root (*Panax ginseng*).
- Contains polyphenols and catechins from green tea.

Possible uses:

- To maintain a normal blood sugar level
- For the supplementary intake of selected plant substances

Bioavailable micronutrients in a pure form

- According to the pure substance principle
- Free of additives
- Without colours, flavours or glazing agents
- Gluten-free
- Lactose-free
- Hypoallergenic
- Vegetable capsule shell
- 100 % vegan
- Quality tested
