

# EpiG stabilize

## BIOGENA EpiG stabilise Gold - developed by experts

BIOGENA is breaking new ground with the premium preparation EpiG stabilize Gold, developed in collaboration with Longevity experts. EpiG stabilize Gold is the first product in the BIOGENA range to contain the promising newcomer alpha-ketoglutarate (AKG).

Alpha-ketoglutarate, or AKG for short, is a natural endogenous substance that occurs as an intermediate in the citrate cycle. This in turn describes a cycle of interrelated reactions in the body for the purpose of energy production and the provision of intermediate products for biosynthesis. As AKG levels decrease with age, scientific interest in this metabolic product has increased since the turn of the century within the field of ageing and cell research.

EpiG stabilize Gold is a unique special complex that meets the needs of the times. The innovative premium formula combines the much-researched alpha-ketoglutarate with optimally dosed polyphenols and epigallocatechin gallate from high-quality green tea extract. The intelligently combined amounts of niacin and calcium also support the energy balance of the cells, while folic acid (Extrafolate-S®) contributes to cell division. This makes the product a must-have for biohackers and those who want to become one.

## BIOGENA EpiG stabilize Gold

- Provides the much-researched metabolic product alpha-ketoglutarate (AKG)
- Contains high-quality green tea extract with polyphenols and epigallocatechin gallate
- With high-dose niacin
- With the branded raw material Extrafolate-S®, which supplies folic acid in bioactive form
- \*Folic acid has a function in cell division.
- Niacin and calcium contribute to normal energy metabolism.

## Possible applications

- To support the cellular energy supply
- For the targeted supply of alpha-ketoglutarate as well as secondary plant substances and plant extracts

## INGREDIENTS

Calcium alpha-ketoglutarate, hydroxypropyl methyl cellulose (capsule shell), nicotinamide, green tea extract, calcium-L-methylfolate.

## RECOMMENDED DOSAGE

1 capsule daily in the morning and 1 capsule in the evening taken with a meal and plenty of liquid.

## NOTE

Food supplement in accordance with EU Directive 2002/46/EC

## IMPORTANT NOTICE

Consume a maximum of 800 mg of epigallocatechin gallate per day. Pregnant or breastfeeding women and children under the age of 18 should not consume EpiG stabilize. The product should not be taken on an empty stomach or on the same day with other green tea products.

## PACKAGE SIZE AND CONTENT

60 capsules (1 month supply), 45 g

Food supplement: The recommended daily dosage should not be exceeded. Not a substitute for a balanced and varied diet and a healthy lifestyle. Store in a dark, dry place at room temperature. Protect from heat. Keep out of reach of children. Suitable for diabetics. The information provided here is not a statement on healing or a recommendation to self-medicate.
