

Junior Ausgleich Formula + CoQ10

With activated vitamin B6

Micronutrients influence the child's mental development

Mental development is a lifelong dynamic process that can be divided into different phases. The child's cognitive development is of particular importance. Various micronutrients, such as vitamins B6 and B12, contribute to the function of the nervous system and have an influence on normal mental function. Oxidative stress can also play a role in the child's mental development and have a significant influence on it. Biogena Junior Balancing Formula + CoQ10 contains various micronutrients to support mental function and selected minerals as a nutritive contribution to protecting cells from oxidative stress.

Junior Balancing Formula + CoQ10

- Vitamin B6, B12 and magnesium contribute to the normal function of the nervous system
- Vitamin B6, B12 and magnesium play a role in normal mental function
- Zinc supports normal cognitive function
- Manganese and zinc contribute to the protection of cells from oxidative stress

Possible uses:

- To support the normal function of the nervous system
- For normal mental and cognitive function
- To protect against oxidative stress
- For the additional supply of taurine, coenzyme Q10 and grape seed extract
- For a supplementary supply of the vitamins and minerals contained, e.g. in case of increased requirements

Bioavailable micronutrients in a pure form

- According to the pure substance principle
- Without colours, flavours or glazing agents
- Gluten-free
- Lactose-free
- Hypoallergenic
- 100 % vegan
- Vegetable capsule shell
- Quality tested
- Child-friendly capsule size
