

BIOGENA minis - Biogena AkutHaut® Balance

Biogena AkutHaut® Balance: So that the skin can breathe again.

Clear, smooth skin is associated with beauty and radiance, and youthful vitality is also reflected in an even and clear complexion. Unfortunately, there are numerous stresses and strains in everyday life that place demands on our skin. Environmental influences such as UV radiation, dry air and fine dust weaken the structure of our skin and make us look old - literally! But stress at work or school, convenience food low in vital substances, and the hormonal chaos known as puberty can also throw our radiant complexion out of balance. Creams and lotions only help from the outside, and quickly reach their limits. Selected vital substances, on the other hand, can provide nutritional support for the skin's appearance, and reach deeper structures and tissues from the inside.

Biogena AkutHaut® Balance is a product that not only literally gets under the skin! Designed as a formula upgrade of our popular "AK-Haut Formula", Biogena AkutHaut® Balance combines in its unique formula a proven combination of various micronutrients to support a balanced skin appearance. It includes zinc, for example, as a highly bioavailable zinc picolinate, and vitamin C, both of which contribute to the maintenance of normal skin. Vitamin C supports the body's own collagen formation and, together with zinc, helps to protect the cells from oxidative stress. Vitamin A is also important in skin maintenance and should not be missing in the course of a formula upgrade. In addition, Biogena AkutHaut® Balance provides an extra dose of OPC with the pigeon seed extract it contains - these are oligomeric proanthocyanidins, a group of valuable plant compounds that occur naturally in plants and protect them from free radicals. The two branded raw materials Boswellin®, a premium extract of frankincense with a standardized content of beta-boswellic acids, and Yestimun®, high-quality beta-glucans extracted from yeast, round off the formula.

Biogena AkutHaut® Balance

- Zinc and vitamin A contribute to the maintenance of normal skin
- Vitamin C supports collagen formation for normal skin function
- Zinc and vitamin C contribute to the protection of cells against oxidative stress
- With beta-glucans from yeast and extracts from frankincense and grape seeds

Possible applications:

- Practical trial size
- Small gift for family & friends
- For a balanced skin appearance
- As a nutritional-physiological contribution to the support of the skin function
- For the supplementary supply of high-quality beta-glucans from yeast and plant extracts from frankincense and grape seeds
