

BIOGENA minis - ImmunoMyk®

Test me!

Are you unsure whether our **ImmunoMyk®** is right for you? Or are you looking for a small gift? Our BIOGENA minis are exactly what you need. **Small & fine.**

ImmunoMyk® combines mushroom extracts from reishi and shiitake with plant-based vitamin C from acerola and camu camu fruit extract as well as vitamin E and zinc. Vitamin C and zinc play an important role in supporting the body's immune system.

Reishi and shiitake: extracts with tradition

Vital mushrooms such as reishi (*Ganoderma lucidum*) and shiitake (*Lentinula edodes*) have a tradition going back more than a thousand years and are of great importance in Asia. The use and knowledge of these mushrooms developed independently in Japan, China and India.

ImmunoMyk®: Vital mushrooms plus immune nutrients°

To ward off external influences and stay healthy, our organism has an effective protective system with efficient defense mechanisms: the immune system. A balanced diet, plenty of outdoor exercise and a balanced psyche are essential prerequisites for a resilient, healthy immune defense. However, the body often needs additional external support. Here, selected micronutrients such as vitamin C, zinc and E can help to support the body's own defenses.

- Vitamin C contributes to the normal function of the immune system and to reducing tiredness and fatigue
- Zinc supports the normal function of the immune system
- Zinc, vitamin C and vitamin E help to protect the cells from oxidative stress.

Possible applications:

- Practical trial size
- Small gift for family & friends
- For nutritional support of the body's own defences
- For targeted intake in times of increased physical and mental stress
- For the supply of reishi and shiitake extracts
