

Spirulina 400

The natural, 100 % vegetable supplement

Spirulina platensis: Premium algae from Austria

Since its discovery as a purely herbal food supplement, it has made a triumphal march around the world and enjoys great popularity in modern nutrition - the green-blue microalgae *Spirulina platensis*. Unfortunately, algae are particularly good at absorbing heavy metals and other undesirable substances from their environment. To avoid polluted source material, it is important to look for responsibly cultivated algae when selecting raw materials. Biogena Spirulina 400 is made from high-quality and quality-tested microalgae from Austria. The Jongerius ecoduna® brand Spirulina algae used here is cultivated in a controlled environment in a patented closed glass tube system and exhibits the highest quality and purity. Only sunlight, selected nutrients and the purest Austrian drinking water are used in the production of this high-quality algae product from domestic production. Spirulina is characterised by naturally occurring secondary plant substances such as phycocyanin and carotenoids. Thanks to the gentle spray-drying process, these and other valuable ingredients are retained.

Spirulina 400

- Contains highly pure *Spirulina platensis* - algae from patented Austrian production (Jongerius ecoduna®)
- Gentle spray-drying to preserve valuable ingredients
- Free from heavy metals, toxins and pesticides

Possible uses:
