

Zeolith ultrafine

Zeolite ultrafine - The solution to support detoxification

The intestinal wall is a dynamic structure that interacts with various stimuli and protects the body from unwanted substances from the intestinal environment. By using zeolite as a powder or in capsule form, you can help the intestines to rid themselves of harmful substances so that they cannot enter the body via the digestive tract in the first place. Detoxification that takes place in a completely natural way. This keeps the intestines, the central element for your health, in top form and also reduces the symptoms associated with chronically high levels of heavy metals, such as tiredness and headaches.

Biogena Zeolite Ultrafine is a natural medical product that supports the binding and elimination of heavy metals (especially lead, mercury, chromium, cadmium, aluminum and nickel) from the body of adults. Clinoptilolite zeolite is an aluminum silicate that acts as a cation exchanger, which passes through the digestive tract and develops its physical effect there. In the gastrointestinal tract, the zeolite binds ammonium and heavy metal ions, in particular lead, cadmium, mercury, aluminum, chromium and nickel. These are then excreted naturally together with the zeolite via the stool.

The branded raw material klinopur® zeolite used in this product comes from Natur Vital Handels GmbH, an Austrian quality manufacturer. Klinopur® is the only manufacturer in Europe to use its own raw material for the careful production of its medical product. Klinoptilolite zeolite from Klinopur® is a pure natural product and is characterized by the best quality and purity as well as a particularly high clinoptilolite content. The raw material is extracted in the company's own extraction area in the midst of nature, strictly controlled and free from environmental influences. A worthwhile effort that is reflected in the quality of this pure active ingredient in Biogena Zeolith ultrafein. In addition to our own mining site, a special grinding process, micronization, is also responsible for the high quality. Micronization results in an extraordinarily fine powder, which optimizes and activates the natural effect of clinoptilolite.

Biogena Zeolite ultra-fine to support detoxification - with volcanic power from nature

Zeolite ultrafine

- With the branded raw material Klinopur® zeolite
- Obtained in an exclusive mining area unencumbered by environmental influences in the midst of nature
- Best zeolite raw material through careful testing and selection
- Optimum effect and activation thanks to special, ultra-fine grinding process
- Assured continuity of the mineralogical composition
- Quality assurance along the entire value chain, from extraction to grinding and packaging

Possible applications

- For the intake of pure clinoptilolite zeolite of the best quality (Klinopur® Zeolite)
- To support detoxification by binding the heavy metals lead, mercury, chromium, cadmium, aluminum and nickel in the gastrointestinal tract

Premium zeolite in Biogena quality

- According to the pure substance principle
- Without colorants
- Gluten-free
- Lactose-free
- Fructose-free
- 100 % vegan
- Hypoallergenic
- Tested quality

INGREDIENTS

100 % clinoptilolite zeolite, ultra finely ground

RECOMMENDED DOSAGE

Method and duration of use: Medical product for oral use: Stir ½ teaspoon (= 1 g) into a glass of water (250 ml) 2-3 times a day and drink immediately with meals. The maximum duration of use is 12 weeks. If you take the product repeatedly, take a break of at least one week.

NOTE

Medical device (CE 0477) Zeolite ultrafine has been approved as a medical device in the EU by an accredited test center. Please follow the instructions for use on the label carefully when taking this product.

IMPORTANT NOTICE

Side effects: Constipation may occur, particularly in the first week after taking the medicine. In very rare cases, flatulence, stomach pain, nausea, dizziness and tiredness may occur at the beginning of the intake.

Interactions: When taking medication at the same time, make sure to take it 2 hours apart. Unless otherwise prescribed by your doctor, take your medication before taking Biogena Zeolite ultrafine.

Warnings and safety instructions: Stop taking if you notice any unexpected side effects and consult your doctor. If constipation occurs, increase your fluid intake, reduce the dosage and consult your doctor if necessary. Use in patients with existing constipation, impaired kidney function, with an existing illness, with drug therapy or with chemotherapy or radiotherapy may only be carried out after consultation with a doctor. Breastfeeding or pregnant women, children and adolescents (under 18 years of age) must consult their doctor before using the medical product. Do not inhale the product. Do not use at the same time as alcoholic, caffeinated and acidic drinks such as grapefruit, orange, lemon and pineapple juice. In case of eye contact, rinse the eyes sufficiently. Ensure adequate hydration in the form of water or other non-alcoholic drinks during use. Not intended for continuous, uninterrupted use. Discontinue use if you notice an unusual effect.
