

Zinc & Acerola

To support the body's defences

Zinc and vitamin C from the acerola cherry for natural immune function

A strong immune system is particularly important during the winter months and during persistent physical or mental stress, and it should be supported in a targeted manner. Zinc is the second most common trace element found in the human body, and together with vitamin C it plays an important role, making it one of the basic parts of the immune system. The cherry-red acerola fruit contains a particularly high amount of vitamin C, and in addition to this important vitamin, it also provides many other secondary plant substances. These characteristics make it an excellent source of vitamin C. Biogena Zinc & Acerola contains zinc and natural vitamin C from the acerola cherry and can therefore specifically increase the daily supply of these micronutrients while supporting the functions of the immune system.

Zink & Acerola

- Zinc and vitamin C contribute to the normal functioning of the immune system
- Contains natural vitamin C from the acerola cherry

Possible uses:

- To support the body's defences
- For the targeted supply of vegetable acerola fruit powder

Bioavailable micronutrients in a pure form

- According to the pure substance principle
- Without colours, flavours or glazing agents
- Gluten-free
- Lactose-free
- Hypoallergenic
- Vegetable capsule shell
- 100 % vegan
- Quality tested
