

fit@work® Premium Gold

Power through the working day

Everyday working life can be demanding. One works under constant deadline pressure, stands under permanent stress, feels partly overtaxed and burnt out. In the long run we reach our limits, the strain overpowers us and body and psyche are weakened. Anyone who wants to achieve top performance in the long run despite the many challenges we face must have "a healthy mind in a healthy body". A balanced diet can make a decisive contribution here. All too often, however, the fresh and preferably vitamin-rich food has to give way to sweet snacks or biscuits, which only provide short-term energy and are also low in nutrients. The combination of strenuous everyday work and suboptimal nutrition also leads to a long-term loss of our psychological resistance, the so-called "resilience". Studies have shown that resilient people are more successful at work, emotionally stable and physically and psychologically fitter. Biogena has developed fit@work® Premium Gold to counteract everyday stress at work and to support their own resilience. This not only supports personal performance, but also helps us to cope with everyday stress situations. fit@work® Premium Gold - so that you don't lose your way either.

fit@work® Premium Gold

- Combination of vitamins, minerals, trace elements and coenzyme Q10 in the active ubiquinol form for daily supplementation in times of increased stress.
- Magnesium supports the energy metabolism
- Potassium contributes to maintaining normal blood pressure
- Vitamin D contributes to a normal function of the immune system
- Zinc and selenium play a role in protecting the cells from oxidative stress.
- The vitamins thiamine (vitamin B1), niacin, biotin and B12 support the normal function of the nervous system and the psyche.
- Riboflavin, folic acid and pantothenic acid help reduce fatigue

Possible applications:

- To support increased strain and stress in everyday working life
- To maintain performance and personal resilience (= psychological resilience)
- For fatigue and exhaustion and to support the normal functioning of the psyche and the nervous system.
- For needs-based use within the framework of occupational health management
